HENKE MECHANICAL FLOAT LINK

- › Allows the plow to “float” up and down over uneven terrain, following the contours of the road
- › Adds an additional 10"- 12" of vertical travel to the plow
- › Sight gauge makes it easy to set the plow in proper position (pushframe parallel to the ground)

SWIVEL BACK PLATE

- › Enables the plow to follow the crown of the road giving it the flexibility to float side to side

Take your blade to the ultimate level of performance!
